Subject: East Basin Sewer Rehabilitation Project

The City of Torrington WPCA has awarded the East Basin Sewer Rehabilitation Project to Insituform Technologies, LLC. The project includes the cleaning, inspection, testing, sealing and lining of approximately 57, 000 feet of sanitary sewers in the East Basin. Work is expected to begin September 19, 2016.

For a complete list of streets affected please follow link below or check the City of Torrington website under Public Works/Water Pollution Control/Current and Future Projects/East Drainage Basin.

[City of Torrington, CT - Current and Future Projects](#)

This project is projected to be completed in the spring of 2017.

Residents that will be affected by this project will be notified by Insituform Technologies staff. They are required to give one (1) week notice followed by a 24 hour notice when they will commence operations in your area. Please be advised there will be a temporary interruption in your sewer service and you will be asked to refrain from using water to prevent a sewer backup while the sewer line is rehabilitated. You will be notified when your sewer service has been restored.

If you experience issues with your sewer service after having been notified that service has been restored please contact an Insituform Technologies staff member or contact the WPCA.

If you have any questions or would like additional information please check our website www.torringtonct.org or contact the WPCA at 860-486-9166 or ray_drew@torringtonct.org

Thank you for your cooperation and understanding as we complete this project to better serve you.
